WORK

Postdoctoral Researcher, University of Oxford <i>Department of Physics/ Department of Engineering</i> <ul style="list-style-type: none">Supervisor: Sonia Contera, Antoine Jerusalem.Research Topic: Zero-Emission Building Materials Enhanced by Artificial Intelligence	Oxford, United Kingdom	10/2024-Present
Postdoctoral Researcher, Delft University of Technology <i>Department of Materials, Mechanics, Management & Design, Faculty of Civil Engineering and Geosciences.</i> <ul style="list-style-type: none">Supervisor: Erik Schlangen, Branko Savija.Research Topic: Generative Machine Learning for Synthesizing Microstructure of Cementitious Materials	Delft, The Netherlands	04/2024-10/2024

EDUCATION

PhD Candidate, Delft University of Technology <i>Department of Materials, Mechanics, Management & Design, Faculty of Civil Engineering and Geosciences.</i> <ul style="list-style-type: none">Supervisor: Erik Schlangen, Branko Savija.Thesis: Stress evolution in early-age concrete considering autogenous deformation and creep: New experimental and modelling techniques.	Delft, The Netherlands	10/2020-04/2024
MSc Student, Southwest Jiaotong University <i>Department of Tunnelling and Underground Engineering, School of Civil Engineering.</i> <ul style="list-style-type: none">Supervisor: Chuan He, Kun Feng.Thesis: Experimental and numerical study on water permeability of tunnel lining concrete; Structural mechanics of concrete segment lining of shield tunnels.Excellent Master Thesis (2020).	Chengdu, China	09/2017-06/2020
BSc Student, Southwest Jiaotong University <i>School of Civil Engineering.</i>	Chengdu, China	09/2013-06/2017

RESEARCH EXPERIENCE

Microscale testing of cementitious materials <ul style="list-style-type: none">Conducted nano-indentation tests to probe the micro-mechanical properties of cement past. (see representative publication [5, 6])Performed XRD/ ESEM/ MIP for quantifying the hydration products amount and characterizing the microstructural effects on volumetric deformation. (see representative publication [2, 7])	10/2020-05/2024
Macroscale testing of the early-age cracking risk <ul style="list-style-type: none">Tested the stress evolution using the temperature stress testing machine (TSTM), which was collaborated with the Royal BAM Group for the project of Fehmarnbelt Tunnel. (see representative publication [7])Developed the Mini-TSTM which enhances testing efficiency. (see representative publication [1, 2, 4])	10/2020-05/2024
Multiscale modelling of the early-age cracking risk <ul style="list-style-type: none">Developed the finite element method model for simulating the stress evolution in concrete using an exponential algorithm based on rate-type creep law. (see representative publication [1,11])Developed a micro-scale lattice fracture model for simulating creep behavior of cement past (see representative publication [6])Simulated the stress evolution in early-age concrete under realistic boundary conditions and general mixture parameters using a thermos-chemo-mechanical model (see representative publication [8])	10/2020-05/2024
Machine learning for enhancing the modelling efficiency and accuracy <ul style="list-style-type: none">Developed interpretable machine learning models for predicting creep behavior of concrete, which was the Top-Cited Paper at Cement and Concrete Composites Journal. (see representative publication [10])Employed the convolutional neural networks as the predictors of the microscale mechanical properties of cement paste based on microstructure input. (see representative publication [6, 9])Constructed an active-learning model to efficient predict the stress evolution in early-age concrete. (see representative publication [8])	10/2020-05/2024

ACADEMIC SERVICE

<ul style="list-style-type: none">Guest Editor of the special issue “Creep, shrinkage, and durability in cementitious systems” of the journal Construction and Building Materials.	11/2023-06/2024
--	-----------------

- Organized the 12th International Conference of Concrete Creep
- Reviewer of the impactful journals Cement and Concrete Composites/ Construction and Building Materials/ Additive Manufacturing/ Journal of Building Engineering/ Developments in Built Environments/ Structural Concrete/ and Scientific Reports.

11/2023-06/2024
10/2022-05/2024

TEACHING EXPERIENCE

- Supervised the master thesis on early-age cracking risk of reinforced concrete components
- Taught the modelling of the early-age concrete material behaviors in the master course Construction Materials CIEM 1210.

01/2024-10/2024
01/2023-06/2023

CONFERENCE

- Presented the work “Thermo-Chemo-Mechanical model and active ensemble learning for early-age stress evolution of concrete” at ICSBM (International Conference of Sustainable Building Materials)
- Presented the work “Bayesian inverse modelling of early-age stress evolution in high-volume GGBFS concrete” at SSCS 2022 (Numerical Modelling Strategies for Sustainable Concrete Structures)

07/2022
Marseille, France
10/2023
Wuhan, China
